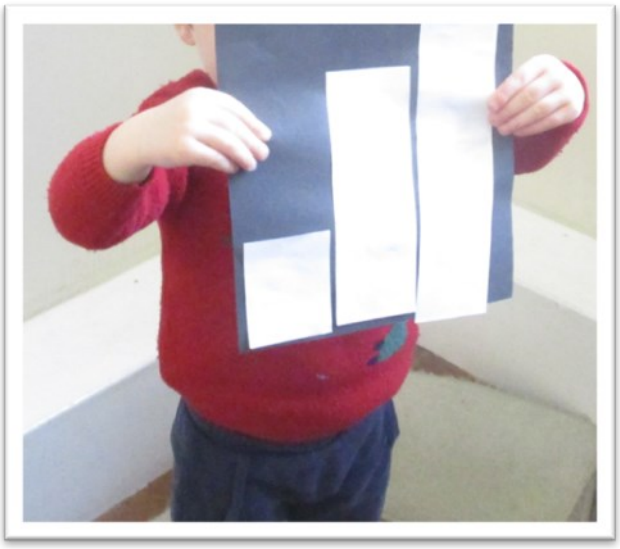
Noah's Ark News

17th March 2023



Dear Parents and Carers,

There has been a mathematical focus at Preschool this week. The children have all enjoyed looking at measurement in different forms. They have been building towers with bricks to show how tall things are, drawing around their hands and feet to see which are the longest and arranging strips of paper in order of length. The book 'Jasper's Beanstalk' has also been shared during our thinking time sessions.

Hopefully all the children have had a chance to make and take home a vegetable pizza this week. They have used their new measuring skills in the cooking activity by measuring out a spoon full of each ingredient (tomato puree, sweetcorn, peppers, mushrooms and cheese) to add to their muffin to make a pizza. We hope you enjoyed sharing these at home.

Wishing you all a lovely weekend,

The Noah's Ark Team
