

Noah's Ark News

Friday 19th June 2026

Dear Parents and Carers,

This week we have been exploring technology in lots of different ways. Technology is something that we all use in our everyday lives and it is important for children to understand different technologies and how they can be used.

In Thinking time we explored how barcodes are used in shops, how the code tells the shop what the item is and how much it costs. We also talked about the receipt we are given which details the products we have bought and tells us how much we have paid.

We also looked at some of the different technologies we have here at Noah's Ark. We have had a go at shredding paper feeding paper into the shredder. We have also looked at the photocopier through in church and the laminator and talked about what they are used for and watched them in action.

The children has also explored using various things such as scissors, hole punches and split pins to see how they work. Holding the item and using them to cut, make a hole or hold bits of paper together.

We have also been doing self portraits this week to go on our display board in the yellow room. Self-portraits allow children to explore and express their identities. We have looked in the mirror to see what our unique features and characteristics are, such as the colour of our hair and eyes and we have painted what we can see. Here are some of the incredible portraits we have done.

We have also been exploring self care and the importance of looking after someone else, as we have enjoyed washing and caring for our babies. The babies have been washed including giving their hair a wash, before drying and dressing them.

The Makaton sign for this week, is 'Time.'

Have a wonderful weekend The Noah's Ark Team.
